

What is the Future of Freedom?

by Chairman Bill Boruff

Have you heard of the "North American Union?" Everyone who loves freedom and independence needs to know about plans to create a North American Union (NAU), which will merge the United States with Canada and Mexico. While virtually ignored in the mainstream media, the leaders of the nations of North America last year announced a plan to combine the infrastructure, security and ultimately the economies of the three nations!

On March 23, 2005 at their summit meeting in Waco, Texas, George Bush, Mexican President Vicente Fox, and former Canadian Prime Minister Paul Martin issued a joint statement announcing the creation of the "Security and Prosperity Partnership of North America" (SPP). The Council on Foreign Relations has endorsed this scheme in their 2005 publication titled "Building a North American Community." If you like the idea of illegal, taxpayer-subsidized labor from Mexico, you will love the concept involved here: an unending flow of unskilled low-wage workers looking for a better life with no cumbersome immigration laws about which to be concerned.

We may now begin to understand why Mr. Bush is wanting to grant "a path to citizenship" for illegal aliens, even though the vast majority of his own constituents oppose it.

People need to understand that the internationalists and globalists behind the scenes at the White House are working at full steam to create this trilateral North American Union. For example, did you know that plans call for building a "NAFTA super-highway" some four football fields wide from Mexico to Canada? And did you know that cabinet level leaders from the U.S., Mexico and Canada have already been positioned? Ultimately, this would require everyone within the three countries to take the same "passport" (translated I.D. card), which would virtually erase the borders between the three countries!!

Present plans call for this incredible surrender of American sovereignty to be done by 2010! Once in place, people and goods would be allowed to enter America unimpeded. If you think illegal immigration is a problem now, imagine the ramifications if this takes effect. The American people were never told about this, nor was the creation of this new agreement ever submitted to Congress for debate and decision. It appears our government has no intention of stopping illegal immigration because the illegal alien invasion is part of the plan. The globalists behind this plan are actively scheming to sacrifice American sovereignty once and for all on the altar of globalism and open borders!

Here is a GOVERNMENT website that foretells the future of America - IF we do nothing about it. The website is www.spp.gov - and this is the same type of start that the European Union had initially. (It's just a trade agreement - Yeah, right!) This website also answers several heretofore seemingly unanswerable questions:

- 1) Why is the US Government allowing the flood of illegal immigrants into the US?
- 2) Why is the US Government spending like drunken sailors putting our currency into near collapse?
- 3) Why are American leaders continuing to constantly meet with the leaders from Mexico and Canada?

We must seriously consider the prospect that the United States of America, as we have known it, will not exist IN THE NEAR FUTURE. You must ask yourself these questions: What am I willing to do to stop it? What am I willing to do NOW to stop it? Is your life of comfort NOW worth more than the FUTURE freedom of your children and grandchildren?
